

ABF Bowdentechnika Kft.

Company Presentation - 2025

“You’re in control—with Bowden cables, it’s a breeze!”

ABF Bowdentechnika Kft.

Company Profile

Address:

ABF Bowdentechnika Kft. 2120, Dunakeszi

127 Rákóczi út. Milestones:

1990:

ABF BOWDENTECHNIKA Kft. was established as the successor to **István Bencze's** previous business. Its main activity is the manufacture of replacement parts for passenger cars and commercial vehicles manufactured in Eastern Europe; its main customer is Magyar Suzuki Zrt.

1993:

A licensing and technical cooperation agreement was signed with the Japanese company NIPPON CABLE SYSTEM.

2013:

Collaboration with KNORR-Bremse Kft.

2021

The customer base changes; Knorr-Bremse Kft. becomes the largest customer.

Company Description:

ABF Bowdentechnika Kft. manufactures mechanically operated Bowden cables and their components, as well as bent tubes, with a workforce of approximately 20 employees, for use in rail vehicles, the automotive industry, and building services engineering.

Core Competency:

- pressing,
- tube bending,
- metal machining,
- metal casting (zinc),
- assembly.

We use Unigraphics NX7 CAD software to design tools and small specialized machines, as well as for product development.

Our largest customer is Knorr-Bremse, and in the automotive industry, it is Suzuki. Production takes place in a manufacturing hall of approximately 1,000 m².

Our company is a founding member of the National Association of Hungarian Automotive Parts Manufacturers.
